- Reverse Logistics
- Advanced Shipping Notices

Things to Consider when Outsourcing your Fulfillment Operations

- Capital investment:**
Infrastructure; technology; people
- Measurement units:**
Make sure to compare apples-to-apples when calculating ROI of outsourcing: Are costs per order? Per item? Per hour? Per pallet?
- Freight savings:**
Outsourcing may help obtain better shipping rates from the 3PL's purchasing power and shipment consolidations
- Facility locations:**
Where are your markets? Look for regional distribution centers near major markets to ensure customer service and minimize freight costs
- Seasonality:**
Look for a 3PL that can handle your seasonal needs, and who is committed to growing with you
