Customs Clearance

Offices all along the Canada/U.S. border

Warehousing

In Toronto, Montreal, Vancouver or Calgary

Fulfillment

To your customers anywhere in Canada

Returns Management

Cost-effective reverse logistics customized to your needs

UNITED STATES

CANADA

Your key to Canada

\$2 billion in trade crosses the Canada/U.S. border every day. How about your product?

Canada is the closest, easiest and quite possibly the most lucrative export market that U.S. manufacturers can access. But to compete, you have to do it efficiently. That's where NRI comes in. As a Non-Resident Importer (NRI), you can access the Canadian market, without any brick-and-mortar expenses.

PBB Global Logistics is the leader in cross-border supply chain management. With logistics facilities strategically located on both sides of the border and serving key regional distribution hubs, PBB gives you immediate, comprehensive coverage of the Canadian market.

To become an NRI, PBB first helps you with all trade and regulatory planning, and then implements an efficient supply chain tailored to your needs.

Consolidation, transborder shipping, Customs brokerage, fulfillment, even returns management are handled seamlessly, cost-effectively and worry-free.

Join the hundreds of NRI customers who rely on PBB to profit from the Canadian marketplace. Shipping to America's largest trading partner is as easy as reaching your domestic markets!

Exporting made easy

Getting Started:

Before you ship to Canada, you'll register with Canada Customs & Revenue Agency as a Non-Resident Importer and qualify for GST and duty recovery if applicable. Through PBB's Trade & Regulatory Services, you'll also ensure your product complies with Canada's marking and labeling regulations. Finally you'll ensure compliance with other governmental departments and agencies.

From Plant Floor to Customer Shelves:

Set up a supply chain tailored to the location of your U.S. production facilities and your Canadian customers. PBB's logistics centers in Buffalo, Seattle and Chicago serve as staging points for consolidating multiple orders into a single shipment. Then, after a single Customs entry, your product is warehoused in PBB's Canadian distribution and fulfillment centers. Or FTL/LTL there directly from your facility in the U.S. Returns are handled just as efficiently, so all duties and taxes are recovered accordingly.

Cost Efficient and Worry Free:

NRI is the most efficient way of shipping to Canada. It's a fraction of the cost of the alternative: preparing orders in the U.S., clearing Customs in individual shipments and incurring international freight expenses. It also allows you to export to Canada using your existing distribution network. No need for foreign branch offices or warehouses.

Shipment Visibility:

With PBB's e-globallogistics.com™ on-line supply chain management tools, you maintain visibility of your orders from beginning to end. With interfaces to key Customs release programs, real-time tracking & tracing, e-fulfillment and on-line trade documentation, Non-Resident Importers benefit from order accuracy, better service to their customers and full shipment visibility.
