

Chinese Trade Mission to Toronto

October 18, 2001

Access China!

Take advantage of a unique forum to meet and discuss business opportunities with leading Chinese companies. On October 18, 2001, a major multi-sector delegation from Hubei Province, China, will be in Toronto to participate in one-on-one meetings with North American businesses. These meetings will be carefully selected to match the specific business needs of both Chinese and North American firms. You are invited to complete the form below to assist in this matchmaking process and to participate in the session.

Hubei Province is the economic engine of Central China, with major industries in hydroelectric power generation, metallurgy, machinery, chemicals, automobiles and textiles. Hubei is also known for its strong research sector, particularly in laser, fiber optic communications, bioengineering and new materials.

Why participate?

- Discuss new opportunities with potential Chinese strategic partners – buyers, suppliers, distributors and manufacturers – ready to do business with North American firms.
- Immediate access to a pre-existing network of key Chinese contacts, which would otherwise require years of networking and relationship-building.
- Conduct exploratory research into the China market.
- Experience first-hand how trade missions operate.
